Discover Sculptra

STIMULATES COLLAGEN FOR A NATURAL LOOK

The only facial injectable designed to stimulate collagen with results that last over two years*

*Clinical trial ended at 25 months
Facial collagen loss is a key factor in an aging appearance. Collagen acts as a support structure for your skin, provides overall volume and gives shape to your face. At about age 30, collagen loss decreases elasticity and moisture.¹⁻³

Sculptra® stimulates collagen, helping to replenish lost volume.

“People tell me I look younger, I look refreshed and I look vibrant.”

CHRISTINE, AGE 39
Actual Sculptra® Patient
Sculptra®, or poly-L-lactic acid (PLLA), is unique facial injectable that replaces collagen lost during the aging process. Sculptra® is the only volumizer scientifically designed to stimulate natural collagen growth and lasts more than two years.4-7

Traditional dermal fillers only address wrinkles, lines and folds; Sculptra® works differently. It replenishes lost volume by stimulating growth of your own natural collagen to treat the underlying causes of facial aging. Sculptra® can restore a more youthful, natural look that lasts more than 2 years.

Where IS SCULPTRA® USED?

Sculptra® is used to correct shallow to deep facial wrinkles and folds, by treating them with the appropriate injection technique.

SCULPTRA® IS SUITABLE FOR:

- Deep folds between the nose and the mouth (nasolabial folds) also called smile lines
- The lines framing your mouth (marionette lines)
- Chin wrinkles
- Other facial wrinkles

As your doctor what treatment options are right for you.

Results that last
MORE THAN TWO YEARS

Sculptra® helps your body to regrow your own collagen over an extended period. With Sculptra®, you can expect to see a subtle, steady improvement in lines and wrinkles, resulting in a more youthful look.

In pivotal clinical trials that measured improvement in wrinkle assessment scores (WAS), Sculptra® had results that lasted over 2 years* compared to injected collagen, which lasted less than 3 months.⁷

INDICATION AND
Important Safety
INFORMATION

INDICATION
Sculptra® is intended for use in people with healthy immune systems as a one time treatment regimen of up to 4 injection sessions that are scheduled about 3 weeks apart for correction of shallow to deep nasolabial fold contour deficiencies and other facial wrinkles in which the deep dermal grid pattern (cross-hatch) injection technique is appropriate. Sculptra® may provide cosmetic correction of facial wrinkles with a Wrinkle Assessment Score of 2,3 or 4 as shown in the photos (Figure 1) of the Patients Guide to Treatment.

IMPORTANT SAFETY INFORMATION
You should not use Sculptra® if you are allergic to any ingredient of the product or have a history of keloid formation or hypertrophic scarring. It should not be injected while you have an active skin infection or inflammation in the treatment area and should not be injected into the red area of the lip. Use in the skin near the eyes is not recommended.
Side effects may include injection site discomfort, redness, bruising, bleeding, itching and swelling. Other side effects may include small lumps under the skin that are sometimes noticeable when pressing on the treated area. Larger lumps, some with delayed onset with or without inflammation or skin discoloration, have also been reported.
