Who may get breast implants (INDICATIONS)?

- Breast augmentation for women at least 22 years old for silicone-filled implants.
- Breast augmentation for women at least 18 years old for saline-filled implants.
- Breast reconstruction. Breast augmentation includes primary reconstruction to replace breast tissue that has been removed due to cancer or trauma or that has failed to develop properly due to a severe breast abnormality. Breast reconstruction also includes revision surgery to correct or improve the result of a primary breast reconstruction surgery.

Who should NOT get breast implants (CONTRAINDICATIONS)?

Breast implant surgery should not be performed in women with active infection anywhere in their body, with existing cancer or pre-cancer of their breast who have not received adequate treatment for those conditions, and women who are currently pregnant or nursing.

Please see additional Important Safety Information on next page.
IMPORTANT SAFETY INFORMATION (continued)

What else should I consider (WARNINGS)?

Breast implants are not lifetime devices or necessarily a one-time surgery. You may experience unacceptable dimpling, puckering, wrinkling, or other cosmetic changes of the breast, which may be permanent. Breast implants may affect your ability to produce milk for breastfeeding. Silicone-filled implants may rupture without symptoms. MRI examinations 3 years after surgery and then 2 years after can detect ruptures. Symptoms of a ruptured implant may be hard knots or lumps surrounding the implant or in the armpit, change or loss of size or shape of the breast or implant, pain, tingling, swelling, numbness, burning or hardening. Talk to your doctor about removing ruptured implants. Inform any other doctor if you have implants.
Natrelle® ConfidencePlus® Warranty Program

All Natrelle® Gel breast implants come with a FREE 10-year warranty covering capsular contracture (Baker Grade III/IV).
